Rockville, MD 20857

I am writing as a member of CSPI (Center for Science in the Public Interest). In doing so, please ban the use of medically-useful antibiotics currently in animal feed. I feel this current practice promotes bacteria resistant to antibiotics.

The result, I believe, is being seen today when doctors treat life-threatening bacterial infections occurring in humans and their patients' ~~sicknes~~ sickness is resisting the antibiotic treatment.

Ban medically-useful antibiotics from animal feed.
